REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 1-13 is the inclusion of a measuring member for measuring the electrical property of the transfer member; and a transporting speed setting member that sets a transport speed at which the transport member transports the recording medium based on the width and the type of the recording medium inputted through the input member, and the electrical property measured measuring member. This is found in all of claims 1-13, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 14-23 is the inclusion of a measuring member for measuring the electrical property of the transfer member before the transfer member performs the transfer; and a transporting speed setting member that sets a transport speed at which the transport member transports the recording medium based on the properties of the recording medium inputted through the input member, and on the electrical property measured measuring member. This is found in all of claims 14-23, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings filed on 10/20/03 have handwritten letterings.

Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings.

The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
